EDUCATION

Virginia Tech **Aug 2022 – May 2024**
Master of Science (M.S.), Computer Engineering | GPA 4.0 *Blacksburg, Virginia, US*
Courses: Advanced Machine Learning, Computer Vision, Natural Language Processing, Deep Reinforcement Learning

Delhi Technological University **Aug 2015 - May 2019**
Bachelor of Technology (B.Tech.), Electrical Engineering *New Delhi, India*

PROFESSIONAL EXPERIENCE

Graduate Research Assistant (Advisor: Dr. Anuj Karpatne) **Sep 2022 – Present**
Dept. of Computer Science, Virginia Tech *Blacksburg, USA*
- Working on multimodal learning and Generative AI using **Stable Diffusion** and variational autoencoders (**VAEs**).
- Extracting genomic sequences using images to study the evolutionary traits of species and generate ancestral images.
- Using science-guided to generative models like **GANs** and **transformers** (GPT) to help biologists study evolution of species

Software Engineer (Quantitative Trading) **May 2020 - July 2022**
Theremin.ai *Mumbai, India*
- Designed and built a **Trading Platform** to handle more than **$10 Million** in the Indian stock markets.
- Framework was based on an **event-driven architecture** capable of intraday trading, simulated trading, and back-testing.
- **10x** volume increase to 1000 securities using **Kafka** streaming for managing real-time price data from stock exchange.
- Designed APIs to closely integrate the **ETL** pipeline & Platform with the ML models. Transitioned production to AWS.

Software Engineer **June 2019 - Apr 2020**
Fractal Analytics *Mumbai, India*
- Built multiple ML models for **Comcast** leveraging ensemble methods like **Random Forest** and **XGBoost**.
- Big data processing with 10,000+ variables using feature engineering like **variable binning** and clustering, and **PCA**.
- Models were developed for maximum likelihood estimation (**MLE**) for their target marketing strategies. Achieved an F1 score of 77%, improving the existing client models.

Research Intern (Advisor: Dr. R. Venkatesh Babu) **May 2018 - July 2018**
Vision and AI Lab, IISc Bangalore *Bangalore, India*
- Worked on **unsupervised depth estimation** and scene parsing using stereo and monocular images using Tensorflow
- Depth for indoor scenes was predicted using Fully Convolutional Residual Networks (FCRN) on the NYU-Depth v2 dataset
- Outdoor monocular depth estimation using **CNNs** (ResNet-50) and fovea transformations - Cartesian Variable Resolution.
- The absolute and squared relative errors were reduced by 0.7% and 2% resp on the KITTI stereo test dataset

PUBLICATIONS

PEER-REVIEWED

- Mohannad Elhamod, **Mridul Khurana**, Harish Babu Manogaran, …, Anuj Karpatne. *"Discovering Novel Biological Traits from Images using Phylogeny-guided Neural Networks".* In *Proceedings of the 29th ACM SIGKDD Conference on Knowledge Discovery and Data Mining (**KDD**) 2023 (Paper published + Oral)*
  - **Oral + Poster** published in *Computer Vision and Pattern Recognition (**CVPR**) Workshop - CV4Animals 2023*

PROFESSIONAL DUTIES

- Reviewer for **NeurIPS** 2023 Workshops:
  - Generative AI and Biology
  - Machine Learning and Physical Sciences

ACADEMIC PROJECTS

Numeral-Aware Language Understanding and Generation Sep 2023 - Present
- Working on enhancing LLMs capability for numerical reasoning and generating numerically aware news headlines.

Decision Transformers in Near Real-World GitHub Feb 2023 - May 2023

- Implemented **Decision Transformers** (DT) and evaluated their efficacy on near real-world Reinforcement Learning tasks.
- Evaluated DT on various offline-RL datasets like D4RL and NeoRL on tasks which mimic near real-world tasks such as Androit (robotoic hand), Finance RL, CityLearn, Industrial Benchmark, Walker2d, Hopper and Half-Cheetah

Sequential Emotion Recognition in Conversations GitHub Sep 2022 - Dec 2022

- Implemented a **BERT**-based model (RoBERTa) along with conditional random fields (CRFs) to capture emotions.
- Benchmarked the model across various datasets - MELD, IEMOCAP, DailyDialog, and EmoryNLP achieving weighted F1 scores of 66.02%, 62.41%, 55.58%, and 39.11% respectively, in line with SOTA.

Remote Sensing - Image Change Detection GitHub Sep 2022 - Dec 2022

- Built a Siamese network using **UNet** and co-attention module and added a segmentation layer to capture pixel-level changes between two images. Also tested the model's robustness to different affine transformations.
- Achieved a cross-entropy loss of 0.826 and Dice coeff. of 0.894.

Visual Question Answering Sep 2018 - Dec 2018

- Image embeddings from VGG-19 were accompanied by each text vector obtained from **GloVe** representation and given as an input to a single layer **LSTM** followed by a CNN layer. Got 52% accuracy on the COCO-VQA dataset.

Human Activity Recognition Feb 2018 - May 2018

- Used VGG-19 to encode visual representation of each frame followed by RNN for the sequential processing of these observations. At each timestep, model outputs the start & end time of action and predicts the action probability.

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Shell Scripting, SQL
- **Technologies:** PyTorch, TensorFlow, OpenCV, WandB, Kafka, AWS, PostgreSQL, MongoDB, OOPs, Git, Jira

ACHIEVEMENTS

- National-level **Gold medalist** in Taekwondo, India. Basketball **- (Gold Medal** at AAHVAAN'17, **Silver medalist** at SPORTECH'17 and UDGHOSH'17)
- Certified **Grade 2** drummer by Rockschool, **Trinity College of London**.
